PROFESSIONAL EXPERIENCE

Societe Generale Pvt Ltd.,
Software Engineer

Apr 2022 – present | Bangalore, India

- Optimized **Azure** resources, resulting in a significant reduction in monthly costs(50%).
- Spearheaded the migration of **Jenkins** and other **CI/CD** tools from old clusters to new, improving system efficiency and productivity.
- Resolved a major data reporting issue that was affecting yearly regulatory reports, ensuring compliance and accuracy.
- Developed a new feature to automate the daily transfer of user data to our access control system, streamlining operations and improving security.
- Enhanced an existing reporting system by adding functionality to generate event-based .ok files for specific reports, improving data accuracy and reducing manual effort.

IBM India Pvt Ltd, *Software Engineer*

Mar 2020 – Mar 2022 | Bangalore, India

- Developed an Online Ticketing tool using **Java** and **SpringBoot**, resulting in improved user access and reduced processing time.
- Created an auto-notification tool for tickets that breached SLA, ensuring timely resolution and improved service quality.
- Streamlined database operations by developing an Excel-based tool to generate **HANADB-SQL** commands, significantly reducing command creation time.
- Served as an **SAP Security Admin**, responsible for access provision and risk analysis using GRC.
- Managed SAP access and resolved issues for third-party users, ensuring smooth operations and user satisfaction.
